

CLAIMS

- [001] A crockery basket (1) comprising at least one rack (3) for arranging items to be washed, characterised by a number of holding elements (5, 10) by which means the at least one rack (3) can be arranged at different height positions (H1, H2, H3) on the crockery basket (1).
- [002] The crockery basket (1) according to claim 1, wherein at least one device (4) comprising a number of holding elements (5) at different height positions (H1, H2, H3) is provided on the crockery basket (1), by which means the at least one rack (3) can be arranged at different height positions (H1, H2, H3).
- [003] The crockery basket (1) according to claim 2, wherein the device (4) comprising a number of holding elements (5) at different height positions (H1, H2, H3) is detachably connected to the crockery basket (1).
- [004] The crockery basket (1) according to any one of claims 2 or 3, wherein the device (4) comprising a number of holding elements (5) at different height positions (H1, H2, H3) comprises at least one fixing ladder (4) which has a number of holding elements (5) arranged substantially above one another at different height positions (H1, H2, H3).
- [005] The crockery basket (1) according to any one of claims 2 to 4, wherein respectively two devices (4) comprising a number of holding elements (5) at different height positions (H1, H2, H3) or two fixing ladders (4) are provided for one rack (3).
- [006] The crockery basket (1) according to any one of the preceding claims, wherein the crockery basket (1) comprises a number of substantially horizontal meshes (2) arranged one above the other, on which at least one rack (3) can be disposed at different height positions.

- [007] The crockery basket (1) according to claim 6, wherein at least one rack (3) has fixing means (9, 10) by which means the rack (3) can preferably be detachably arranged on the meshes (3) of the crockery basket (1) at different height positions.
- [008] The crockery basket (1) according to claim 7, wherein the fixing means (9, 10) on the rack (3) and/or the holding elements (5) of the device (4) comprising a number of holding elements (5) at different height positions (H1, H2, H3) are constructed as clamping connections by which means the rack (3) is mounted preferably detachably on the crockery basket (1).
- [009] The crockery basket (1) according to any one of claims 7 or 8, wherein the fixing means (9, 10) on the rack (3) and/or the device (4) comprising a number of holding elements (5) at different height positions (H1, H2, H3) or the fixing ladders (4) are made of plastic.
- [010] The crockery basket (1) according to any one of the preceding claims, wherein at least one rack (3) is rotatably mounted in its holding element (5, 10) so that the rack (3) can be pivoted between a substantially horizontal position and a substantially perpendicular position.
- [011] The crockery basket (1) according to any one of the preceding claims, wherein the rack (3) has at least one mechanical stop with which the rack (3) is supported on the crockery basket (1) to hold the rack (3) in a substantially horizontal position.
- [012] The crockery basket (1) according to any one of the claims 7 to 11, wherein the fixing means (9, 10) on the rack (3) and/or the device (4) comprising a number of holding elements (5) at different height positions (H1, H2, H3) or the fixing ladders (4) have at least one mechanical stop with which the rack (3) is supported to hold the rack (3) in a substantially horizontal position.
